- Within capital goods, we are optimistic on power T&D and defense due to positive growth outlook owing to government focus on these segments.
- EMS offers a long-term opportunity as a potential beneficiary of shift in global supply chain.
- Auto sector may benefit from GST rates rationalisation. We also anticipate continuation of premiumization trend, supported by a pickup in the replacement cycle.
- In healthcare, we believe hospitals present a structural opportunity.
- We are playing the consumer theme through stock specific approach in discretionary segment as staples grapple with muted volume growth.
- Accordingly, over the last 6 months the fund has increased exposure to capital goods and auto and auto components.
